

KEEPING YOU INFORMED AT THE RALLY

There are a variety of digital channels of communication to help you stay informed in Lewisburg during the WBCCI Rally. It includes the following:

- Emails
- Text messaging
- Web page
- Facebook
- Twitter

The WBCCI Electronic Communication Committee activated a variety of channels so you can use the one or two that are most frequently part of your daily life. The special web page and Facebook page will have more extensive information than text or Twitter. Watch your favorites for updates on schedule changes, room changes and previously unannounced activities. The printed program you received in your welcome packet is your primary source of information (all of the printed program information is available also on the webpage).

Here are some details:

- **EMAIL:** The ECC has an email group distribution system. If you have already registered for the Rally then we have added your email address to the distribution list so you can get emails pertaining to the Rally. You can unsubscribe to the email list by scrolling to the bottom of any message and clicking on "unsubscribe."
- **TEXT:** Text messages on your phone is an option (June 20-July 5). We would like to ask that only members actually attending the Rally sign up to receive text because each costs a few pennies. To sign up to receive text messages during the Rally text the word **RIVET** to phone number 25827. Your cellular phone carrier regular rates may apply.
- **WEB PAGE:** A web page was created by the ECC for the Farmington Rally. You can find it by Googling "2016 International Rally at Lewisburg" or typing <http://lewisburg.wbcci.net/> in your web browser.
- **FACEBOOK:** For Facebook users the ECC has created a special page. Search Facebook for "Lewisburg 2016 WBCCI." Please add your own photos to Facebook during the Rally so all your friends back home can share in the excitement.
- **TWITTER:** Our Twitter feed is at WBCCI@Wally_Byam. Be a follower of WBCCI@Wally_Byam. Please add your own pictures during the rally.

You can unsubscribe from text or emails at any time. There are instructions at the bottom of the messages that explain how to stop.

In case of severe weather, you should proceed to the West Virginia Building #3 immediately. Pets may be taken to the building. Lewisburg has a warm humid climate in the summer and the largest threat of dangerous weather comes from thunderstorms. Every Airstream should have a battery-powered weather alert radio. The NOAA Weather Radio station for Greenbrier County is located in Hinton, about 40 miles west of Lewisburg. NOAA is station WXM71 at frequency 162.550. The best commercial radio station for local weather is [WRON-FM \(FM 103.1\)](#). Television stations that you will probably be able to receive with your antenna are WVVA (Ch 6) and WVNS (Ch 59). There are no weather warning sirens on the fairground. Cell phone weather apps are not equally effective at providing localized warnings of inclement weather, especially if cell service happens to be weak in the area.

If you need help accessing any communication channels, ask friends to help you or seek out any ECC member at the Rally. Sometimes it is nice to learn new skills at the Rally. Have fun!

Electronic Communications Committee at rally: Carolyn Beardshear, Deb Wood, Steve Padgett. Program Assistants: Harold Higgins, Alfred Akers, Wayne and Carroll Barth.
